Mangrove est un emprunt à l'anglais (). Mangrove en anglais désigne d'abord *Rhizophora*, en particulier *Rhizophora mangle* de la famille *Rhizophoraceae*. Le mot provient probablement du portugais mangue ou de l'espagnol mangle, ou du taïno. Le suffixe grove provient de l'anglais [3] (jardin, bosquet). Par extension mangrove désigne en français comme en anglais le biome où croissent ces arbres ...

My Botany was limited to high school in the 1950's. All my college biology was animal related in a quick segue as a math/physics major to medical school. Who knew how complex Botany is, I sure didn't! The Professor does a great job keeping this complex overview light and interesting. I'll once again view another corner of my world in a different light, Thank You Great Courses. (I had to put ...

Bulb, in botany, a modified stem that is the resting stage of certain seed plants, particularly perennial monocotyledons. A bulb consists of a relatively large, usually globe-shaped, underground bud with membranous or fleshy overlapping leaves arising from a short stem. A bulb's fleshy leaves—which in some species are actually expanded leaf bases—function as food reserves that enable a ...

If mangroves and salt marshes are able to maintain elevation above the sea surface despite accelerated sea-level rise, then their ability to sequester C may be maintained or increased (Langley et al. 2009). However, if insufficient sediment or root growth is available to maintain elevation, then they may be eroded or flooded. Studies of C accumulation in salt marshes in South Carolina

Hutan bakau atau disebut juga hutan mangrove adalah hutan yang tumbuh di air payau, dan dipengaruhi oleh pasang-surut air laut. Hutan ini tumbuh khususnya di tempat-tempat di mana terjadi pelumpuran dan akumulasi bahan organik. Baik di teluk-teluk yang terlindung dari gempuran ombak, maupun di sekitar muara sungai di mana air melambat dan mengendapkan lumpur yang dibawanya dari hulu.
