The author even goes so far as to mention the designs that were never brought to life, insight into the F-35 program, and the future of the British Aircraft Carriers. Mr. Hobbs is also not afraid to talk about the limitations of each of the aircraft carriers, which is very welcome (many authors tend to merely focus on the strengths and never weaknesses).

The Malta-class aircraft carrier was a British large aircraft carrier design of World War II. Four ships were ordered in 1943 for the Royal Navy, but changing tactical concepts, based on American experience in the Pacific War, caused repeated changes to the design, which was not completed before the end of the war.

The first seaplane carrier, the French Foudre (right, with hangar and crane), with one of her Canard Voisin seaplanes taking off, during tactical exercises in June 1912. The invention of the seaplane in March 1910—with the French Le Canard—led to development of the earliest ship designed as an aircraft carrier, albeit limited to aircraft equipped with floats: in December 1911 appears the ...

[Were Armored Flight Decks on British Carriers ... - NavWeaps](#)

Britain's two new aircraft carriers are leviathans and an extraordinary feat of British engineering. Standing on board, it's hard not to be impressed by the sheer scale.

[Aircraft Carrier Design History](#)

Military aircraft - Military aircraft - Interwar developments: In the two decades between the end of World War I and the start of World War II, military aviation underwent a complete transformation. The typical combat aircraft of 1918 was a fabric-covered externally braced biplane with fixed landing gear and open cockpits. Few aero engines developed as much as 250 horsepower, and top speeds of ...

[British Aircraft Carriers Design Development Service Histories](#)

Carrier-based aircraft, sometimes known as carrier-capable aircraft or carrier-borne aircraft, are naval aircraft designed for operations from aircraft carriers.They must be able to launch in a short distance and be sturdy enough to withstand the abrupt forces of launching from and recovering on a pitching deck.
