Data warehouse companies are improving the consumer cloud experience, making it easiest to try, buy, and expand your warehouse with little to no administrative overhead. Data warehousing will become crucial in machine learning and AI. That's because ML's potential relies on up-to-the-minute data, so that data is best stored in warehouses—not lakes. When developing machine learning models ...

Text data files were generated using TPC-H data generation DBGen tool.. The files were stored on Azure Blob Storage and copied to Amazon S3. The same files were used to load Azure SQL DATA WAREHOUSE with Polybase CTAS command, and Redshift using COPY command from their respective cloud data stores. After the data files were loaded, it was confirmed that the row counts were identical.
