The 1881 construction season was a bust and the railway's Chief Engineer and General Superintendent were fired at the end of the season after building only 211 km (131 miles) of track. Syndicate member and director James Jerome Hill suggested William Van Horne was the man who could get the job done. A rising star in the U.S., Van Horne was lured with a sizeable salary to become CPR General ...

Construction on the Time-Life Building's steelwork started in April 1958, and the structure topped out in November of that year. The cornerstone of the building was laid in June 1959, after the building's structure had been completed, and the first tenants began moving into the tower in December 1959. During this time, plans called for Rockefeller Center to expand northward.
